Amy Chelesnik, who was named Del Mar Heights' Volunteer of the Year for her work in the school garden, checks out the giant cabbage.

Cabbage patch kids at Del Mar Heights

BY KAREN BILLING

Del Mar Heights students were able to grow one giant cabbage in the school garden over the last few months — their cabbage tipped the scales at 41.5 pounds, dwarfing many of the young gardeners.

Bonnie Plants donated the giant cabbage seedlings for each of Del Mar Heights' third grade students to plant and observe at home. The

41.5-pounder was planted in the school garden so students could see how their plant was doing in comparison to the one at school.

The students were able to enjoy the fruits of their labor as the Del Mar Highlands eatery Snooze used Del Mar Heights' giant cabbage as well as peaches from their garden at a Farm to Table event at the restaurant on May 24. The chef made peach mamba pancakes and pork tacos with giant cabbage slaw.

Good Health Looks Great On You.

At the Health Nucleus, we are studying how to help you extend your healthy lifespan by providing a comprehensive, genomic-enhanced health assessment. Our new health concept combines whole genome and other "omic" measures with advanced imaging technology to provide personal insight and approaches to your health.

Our team of expert clinicians and scientists are harnessing advances in medicine with new computing and machine learning technology to analyze and interpret your health data. Our purpose is to arm you and your physician with the data to make healthcare more **predictive**, **preventive** and **proactive**. Empowering you to make informed decisions about your health care is what the Health Nucleus is all about.

THE JOURNEY TO A HEALTHY LIFESTYLE STARTS WITH THE HEALTH NUCLEUS.
